

Macduff Robotics

Intelligent Subsea Equipment

Description:

An eight station valve pack with cross over check and adjustable over pressure relief valves on both the A and B output lines of each station. Fitted as standard with internal pressure sensors on the pressure feed and return lines, with full control of the unit over RS232 serial data link.

8 station hydraulic valve pack.

MAIN FEATURES

- 8 NG3 valves.
- Solenoid or proportional valve control.
- Flat base for easy in mounting.
- Rated for use up to 210bar hydraulic pressure.

Further Information

Advanced spares kits also available

Equipment supplied

Standard tool supply includes

- Valve pack assembly
- Operating Manual
- Basic spares kit (seal set)
