

Macduff Robotics

Intelligent Subsea Equipment

Custom hydraulic manifolds designed for specific applications to minimise pipework, leak paths, overall part count, and cost. Gives significant benefits in reliability and operation. Available in aluminium, steel, and stainless steel, with pressure ratings upto 350bar.

Custom Hydraulic manifolds

MAIN FEATURES

- Minimises pipework and leakpaths.
- Significant space reduction.
- Cost reduction.
- High flow capacities achievable.

Further Information

All major cartridge types catered for including SUN, Wandfluh, and Winner.

Equipment supplied

Standard tool supply includes:

- Manifold unit c/w fittings and cartridges
